EDUCATION

Bachelor of Science, Artificial Intelligence
Virtual University of Pakistan

2025 - 2029
CGPA: 3.5

PERSONAL PROJECTS

SketchLine

- Practice-first design & sketching app where every lesson ends on an interactive live whiteboard
- Users apply a technique directly — placing shapes, colors, and linework — then get feedback in seconds
- Built around learning-by-doing rather than passive reading

Queueless

- AI-powered queue management system for hospitals, clinics, and public service centers in Pakistan
- Implemented QR-based queue access and live queue tracking to reduce physical waiting time
- Designed smart wait-time prediction to give visitors accurate expected wait estimates

AI Workflow Automation System

- Developed automation pipelines using n8n + Apify APIs
- Automated data scraping, processing, and reporting
- Reduced manual workflow time by 40%+
- Integrated API-based triggers and real-time updates

EXPERIENCE

AI Student Trainee - AISkillBridge Apprenticeship

July - Nov 2025

- Gaining hands-on experience in applied AI, agentic systems, and product development through the AI SkillBridge Bootcamp
- Building real-world AI solutions using Python, LangChain, CrewAI, n8n, and generative AI APIs, including recommendation systems and conversational agents
- Designing and deploying multi-agent workflows for automation, decision-making, and digital applications across domains
- Collaborating on MVPs and startup ideas in hackathons while developing skills in problem-solving, product thinking, and teamwork

Machine Learning Intern — FlyRank Online

Feb - Mar 2025

- Worked on end-to-end machine learning pipelines, including data preprocessing, model development, training, and evaluation for real-world problems
- Built and documented ML solutions with clear presentations and ethical best practices, including technical reports and video demonstrations

TECHNICAL SKILLS AND INTERESTS

Languages: Python, SQL

AI/ML: Scikit-learn, TensorFlow, Keras, PyTorch (basic)

Data Science: Pandas, NumPy, Matplotlib

NLP & GenAI: OpenAI APIs, Prompt Engineering, Chatbot Development

Tools: Google Colab, Jupyter, Git, n8n, Apify

Deployment: REST APIs (basic), Streamlit, Flask

Concepts: Regression, Classification, KNN, Feature Engineering, Model Evaluation

LICENSES & CERTIFICATIONS

Machine Learning using Python — SimpliLearn

Issued Jan 2025

Episode 2: Startup Edition of 'For the Love of AI' — Google Developer Groups on Campus, COMSATS University Attock

Issued Feb 2026
